

Jordan Rivera
Backend Software Engineer

Experience

Senior Backend Engineer, Northwind Systems, 2021 to present
Built and operated a Python and FastAPI service handling 2 million requests per day. Owned the Postgres schema and query performance. Wrote Docker images and deployed them to Kubernetes on AWS. Introduced pytest coverage across the payments module.

Backend Engineer, Aperture Labs, 2018 to 2021
Built REST APIs in Django and Flask. Used Redis for caching sessions. Set up CI pipelines with GitHub Actions and wrote Terraform for AWS. Worked with PostgreSQL, wrote SQL migrations, and tuned slow queries.

Skills

Python, FastAPI, Django, Flask, PostgreSQL, Docker, Kubernetes, AWS, Redis, Git, GitHub Actions, Terraform, pytest, REST API design.

Education

B.S. Computer Science, State University, 2018
